

TIME TO SMILE Artemis

ENVIRONMENTAL POLICY

TIME TO SMILE Artemis recognizes the environmental impact of the hotels' operations and is keen to work in a more efficient way to reduce and minimize that impact. We focus on energy, water and waste. This policy is implemented in our (daily) business operations and is relevant to all stakeholders of the hotel, including our customers. Not only do we want to reduce our impacts, this also saves (unnecessary) costs.

To assure this we:

- Have installed water and energy efficient equipment throughout our hotel
- Actively monitor our energy consumption and ensure that we keep our consumption at a minimum
- Consider low energy and other sustainable equipment when purchasing new equipment
- Actively promote the separation of different waste streams and provide guests and employees with easy access to appropriate recycle bins
- Participate in the local recycling waste program where local authorities provide central recycling bins to the hotel to separate glass, paper, aluminum and plastic
- Have installed energy efficient lighting (LED) throughout the hotel
- Ensure that we do not waste water by carefully controlling water flow throughout the accommodation, including our gardens (we have established an automatic dropping system that works at night). We communicate and promote water saving practices to all employees and customers
- Make use of solar thermal panels to heat water
- Make use of eco-friendly and Green Globe certified ADA cosmetics shower liquids
- Train our employees at the beginning of each season about our environmental goals and how they can contribute
- Will comply with all applicable environmental legislation
- Encourage our guests to support us in our environmental goals via (in-room) sustainability communication

This information is communicated to all employees and any third party interested.

Nikos Diakonikolis

Co-Owner/manager TIME TO SMILE Artemis
